Higher Cathedral Rock, North Face, The Constant Gardener

California, Yosemite Valley

Cheyne Lempe and Ethan Pringle established the Constant Gardener (V 5.11+ R A3) on the north face of Higher Cathedral Rock, from September 12–13. The approximately 1,000' climb ascends 600' of new terrain before joining the Chouinard-Kamps-Pratt Route (AAJ 1961). Lempe and Pringle placed one bolt and tried to free climb as much as possible, but they were thwarted by vegetation-filled cracks.
