### **Reddomain (6,112m), Correction**

China, Sichuan, Daxue Shan

In AAJ 2011 we reported the second ascent of Reddomain (6,112m) by a different (northern) approach to the west ridge from that used in 1999 by the Japanese first ascensionists. In fact this was the third ascent, the second taking place on October 4, 2006, when American Alpine Institute guide Aidan Leohr, with clients Bill Filimore and Colin Overy, reached the summit in a 17-hour round trip from their 5,000m high camp. These three followed the original Japanese route, approaching the crest of the west ridge from the south.
